

Qube! Lite Bundle

Qube! Lite™, a full-featured render farm management system for studios with less than 20 servers. Qube! Lite is a great way to get the power of an enterprise, next-generation render farm management system at an entry price and reap all the benefits of a robust, flexible and stable management tool. Get the same system the larger studios use and smaller organizations grow into. Qube! is a perfect platform to build any workflow pipeline upon right now. Don't make the mistake of settling for inferior systems that won't meet your needs for the long haul and will ultimately cost you more time and money.

Start with Qube! Lite and get a render farm management system and a technical support team that you can grow with.

Included in Qube! Lite bundle:

- Ø Supports 1 Supervisor and 19 Workers (servers and/or workstations)
- Ø No licenses required to submit or monitor jobs
- Ø Includes Job Types for all of the top CG applications for in-application job submission (*Maya, 3ds Max, XSI, Fusion, NUKE, After Effects, Lightwave, etc.*)
- Ø Cross-platform support (Windows, Mac OS, Linux)
- Ø Fully customizable GUI for job submission and pipeline management
- Ø Multi-Threaded Supervisor with Dynamic Allocation of Jobs for speed and stability
- Ø Client Server Architecture for scalability
- Ø Global Resource Tracking
- Ø MySQL Database backend for data retention and production tracking
- Ø Floating license to work across a dedicated farm and/or bank of workstations
- Ø Customizable job dependencies and priorities to work with your unique environment
- Ø Technical Support limited to online support forum monitored by a team of CG industry professionals
- Ø Point software releases and bug fixes
- Ø 30-day money back guarantee
- Ø Upgrade path to Qube! Standard

All of this and a killer price of \$2,000 (U.S. Funds)

Getting off on the right foot has never been easier!
